Cryo electron microscopy: basic research and transformation

Prof. Xiangxi WANG

Institute of Biophysics ,Chinese Academy of Sciences

Professor Xiangxi WANG focuses on exploring the various steps of the virus cycle, including the entry, replication and assembly using a combination of structural analysis, cellular assays, virological, reverse genetics and animal studies. The studies of virus cycle facilitate the design of better antiviral compounds and vaccines.

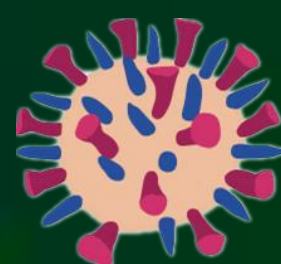

A0201, Life Science Research Building

10:00-11:30AM

November 15 , 2018

HOST: Prof. Lanfeng WANG
